

Complete your view of COVID-19 with T cell testing.

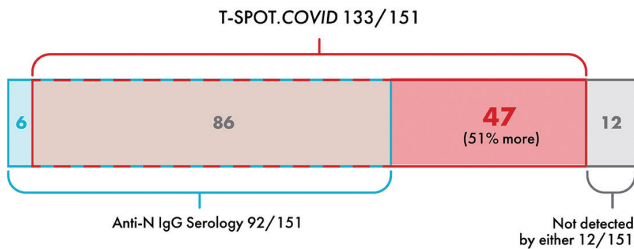

Serology alone is not enough¹

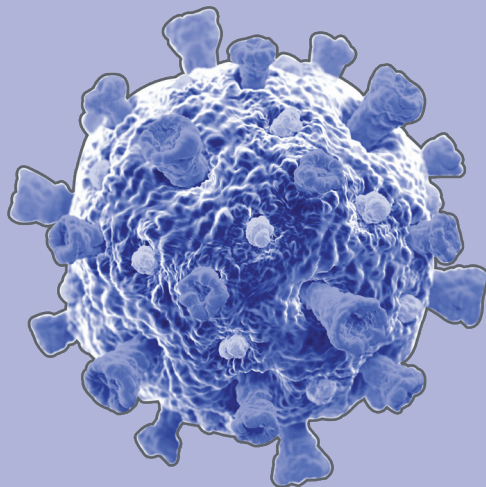

The T-SPOT.COVID test:

- Detects T cell response to SARS-CoV-2
- CE marked for IVD use
- Modified ELISPOT test using the proven T-SPOT technology platform

In a study on US subjects, the T-SPOT.COVID test identified **51% more PCR positive individuals** than serology testing alone.

T-SPOT[®].COVID
